Growing Trend in Medication Abortions

Medication abortion is increasingly difficult to track because the data excludes international and domestic mail order, statistics from states that don't require reporting, and underreporting.⁴

Medication Abortions - Complications

Seeking Help⁵

Critical Need for Secular Healing Options⁵

Approx. **95%** of existing abortion healing programs lead with a **religious** message

Summary

1 in 4 women¹ and 1 in 5 men² will experience abortion by age 45. The majority want healing, but don't know where to go for help.⁵ They prefer anonymity and secular programming.⁵ Offering abortion healing program options that meet the needs of people seeking care is essential to helping them find hope and healing.
